Quality Soffit System

*A quality soffit system that offers
beauty and performance.*

Alside[®]

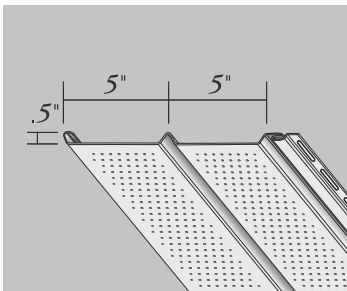

Double 5" Punched Soffit

A quality soffit system that offers beauty and performance.

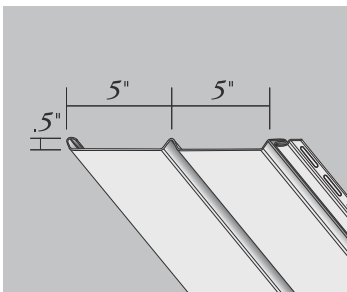

Available in both vented and solid panels, D5 Punched Soffit is made from durable premium vinyl, so it won't warp, rot, chip or peel. Vented panels are designed to maximize airflow and help provide proper ventilation to your attic. Solid panels can be used as vertical siding to add distinction at entryways, gable ends and other areas of interest. Best of all, it never needs staining or painting – just rinse occasionally with a garden hose to restore like-new beauty.

Product features:

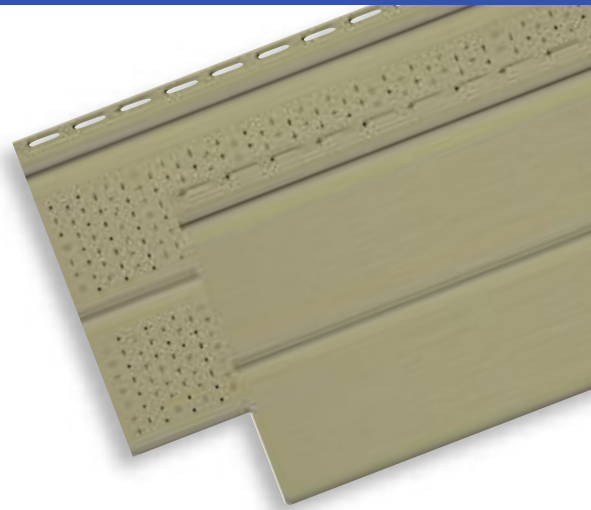

- Available in 12' fully vented or solid panel lengths.
- Vented panels provide 5.3 square inches of net free area per lineal foot.
- V-groove profile creates the look of individual bevel-edged boards.
- Double 5" exposure creates a feeling of openness, even in confined entryways.
- 1/2" butt edge provides realistic shadow lines for maximum visual appeal.
- .042" nominal thickness for full strength and rigidity.
- Light roughsawn texture for an authentic look-of-wood finish.

Vented panels provide air flow needed for efficient attic ventilation.

Solid panels can be used for porch ceilings and vertical siding applications.

Elegant contemporary colors coordinate with all Alside siding, trim and accessories.

Warranty information.
