

New Construction Vinyl Window Collection

Beauty and Performance Designed for Your Homes

The new 1700 and 1900 Series new construction windows offer classically inspired solutions to meet the ever-changing aesthetic, architectural and budgetary needs in new construction.

Solid vinyl construction with fusion-welded corners provide added strength, energy efficiency and weather-tight performance.

Block and tackle balances stand up to the debris of a construction site.

Reinforced meeting rail for superior structural performance.

Cam-style lock with adjustable keeper for increased security.

Sloped sill for a contemporary look and enhanced water management support.

Single frame construction on several combo units reduces potential water entry points. Available in twin and triple single and double-hung, as well as 3-lite sliding units.

Convenient Egress sizes in 3050 single-hung, 4040 single-sliding and 3052 double-hung.

Multiple glass pack options to meet the thermal and energy-efficiency needs of any region.

Interior glazed fixed lites provide convenient access from the inside should the glass need to be replaced.

Drywall pass-through model available for convenient higher floor sheet drywall entry point.

Primed wood jamb extensions are available to support four exterior wall construction depths and reduce interior trim work. 4-9/16", 6-9/16", 7-1/16" and 7-9/16" options are available.

Convenient 1/2" or 5/8" drywall return channel offers an alternative to wood trim and caulking.
