

*Alside proudly presents the Performance Series Gold and Silver New Construction Window Collection. Precision-engineered for enduring beauty and performance, these classically styled windows offer a variety of design solutions to meet the ever-changing aesthetic, architectural and budgetary needs of the new construction professional.*

*For more than 60 years, Alside has provided industry-leading building materials for homes and businesses throughout the country. Our commitment to innovative design, advanced technology, superior craftsmanship and outstanding customer service has defined our legacy. When you choose Alside Windows, you're getting exceptional quality and value backed by decades of leadership and true product design know-how.*

**The Alside Advantage.**

Excellent products, dependable service and a keen understanding of the marketplace are significant advantages of working with Alside. As a visionary company with more than a half-century of success, we have the expertise and insight few building product suppliers can match. Whether your projects involve single-family, multi-family or commercial installations, we dedicate our every resource to making your job easier and better.

**Comprehensive Product Lines** Alside New Construction Windows feature a variety of styles to accommodate every project and price point.

**Dependable Delivery** Maintaining efficient and reliable delivery for our customers is a top priority.

**Commitment to Quality** We stand behind our products with the full faith of our more than six decades in the building products industry.

**Respected Brand Name** The Alside name is recognized and respected for providing quality building products backed by strong warranties.

**Rigorously Tested and Proven for Quality Assurance.**

Built for heavy-duty wear and tear, Alside Windows are continuously tested in state-of-the-art laboratories and verified by independent testing and certification agencies to ensure consistent high-quality and dependability.

Incorporating performance levels beyond AAMA, ASTM and NFRC standards, Performance Series Gold and Silver Windows are tested for air, water, structural load, thermal performance and forced entry resistance. Our windows are certified under AAMA and/or NFRC-approved certification programs. Complete testing data and certification documentation are available upon request.

**Alside Windows**

**Peace of Mind for You and Your Customers**

Alside New Construction Windows will be a proud testament of your craftsmanship and professionalism long after the installation is complete. As a contractor, you'll appreciate the superior quality and easy installation of Alside Windows. Your customers will enjoy the beautiful finish, energy savings and reduced maintenance. You'll both welcome the peace of mind and genuine value that you expect from the Alside brand.

Alside Windows meet all of the requirements of the AAMA and NFRC certification programs for windows and the IGCC® certification program for insulating glass.

Boasting superior form and function, Alside New Construction Windows earn high marks for enduring strength, classic good looks and easy upkeep. The enhanced design of our premium-grade Performance Series™ Gold collection offers a generous measure of refinement, while the Performance Series Silver presents a smart selection for a variety of projects.

### Our Proven Track Record.

For more than 60 years, Alside has provided exceptional building products for homes and businesses throughout the country. Our commitment to innovative design, advanced technology, superior craftsmanship and outstanding customer service has defined our legacy as a true industry leader.

## PERFORMANCE SERIES™ GOLD

### Premium Vinyl Windows

The historically inspired brickmould design of the Performance Series Gold Window calls to mind the distinctive character and charm of a colonial wood window. Handsomely crafted with attention to detail, the window frame incorporates an integral, functional J-channel for easy new construction application.

- High-impact, rigid vinyl frame and sashes constructed with an unplasticized PVC powder blend
- Integral brickmould J-channel and nail fin provides easy installation
- Multi-chambered construction increases thermal efficiency and structural integrity
- Insulating glass with PPG Intercept® Warm-Edge Spacer System increases energy savings
- Full-length, reinforced, uninterrupted interlocking meeting rails reduce air infiltration while enhancing strength and security
- Heavy-duty weatherstripping ensures resistance to air, water and dust
- Available in single-hung, double-hung, sliding, fixed-lite and architectural/geometric shapes
- Choose from White or Beige with a variety of glass and grid options.

PPG Intercept Warm-Edge Spacer System for thermal efficiency  
Double-coated optional Low-E available  
Sloped sill promotes water runoff

Extra-wide brick moulding J-channel for classic beauty

## PERFORMANCE SERIES™ SILVER

### Quality Vinyl Windows

Beautiful, practical and strong, Performance Series Silver Windows promise years of easy operation and timeless style. These solidly built windows make an ideal choice for a variety of residential and light commercial projects.

- Unplasticized PVC powder blend vinyl construction for enduring beauty and strength
- Multi-chambered design enhances thermal performance
- Fully fusion-welded sash and frame adds strength and rigidity
- Heavy-duty weatherstripping helps block air, water and dust infiltration
- Available in single-hung, sliding, fixed-lite and architectural/geometric shapes
- Choose from White or Beige with a variety of glass and grid options

PPG Intercept Warm-Edge Spacer System  
Sloped sill promotes water runoff  
2-9/16" frame with integral nail fin for easy installation

Integral J-channel

### Casement and Awning Windows

Casement and awning windows round out the new construction window offering from Alside. Combine casement or awning windows with a variety of window styles and configurations to create larger window systems that offer ample glass exposure and ventilation.

A beautiful complement to any room, casement windows feature an easy-touch crank to open and close the window. Sash opens to a 90° angle for convenient cleaning from inside the home.

Awning windows are an ideal way to add ventilation to any area. Combine awning windows with fixed-lites for a custom look that's functional yet elegant.

### Patio Doors

Alside Patio Doors let the warmth and beauty of natural light shine through, yet seal tightly shut for excellent thermal performance. High-impact, heavy-duty vinyl frame and sashes, multi-chambered construction, heavy-duty weatherstripping and an insulating warm-edge glass system deliver substantial energy efficiency – a must have for today's energy-minded homeowner.

### High-Performance Low-E Glass

Windows are nearly 80% glass which can be one of the largest areas of energy loss on a home or building. Many people think of glass as being fragile, yet it's one of the most powerful elements in achieving super-efficient window performance.

Upgrading your windows with high-performance Low-E insulating glass will maximize thermal efficiency and energy savings, while minimizing the damaging UV rays that cause carpets and furnishings to fade.

Choose one of Alside's insulating glass packages that combine multi-layer Low-E glass and argon gas, along with the PPG Intercept warm-edge spacer system for increased energy savings. Low-E glass features clear coatings that help filter out the sun's rays in the summer and provides invisible insulation to retain heat on winter nights. Argon gas, a colorless, odorless, nonflammable, nontoxic and safe inert gas between the panes of glass counteracts heat/cold conduction, making the window even more energy efficient. It also reduces noise infiltration.

Alside offers a variety of ENERGY STAR qualified products. Consult your window professional for the optimal glass package required for your home and climate zone.

Alside new construction windows combine multi-layer Low-E glass, argon gas and PPG Intercept Warm-Edge Spacer System to provide maximum energy savings.
