Satinwood® Select

The Alside Steel Collection

Premier Style, Impeccable Performance.
A LEGACY OF EXCELLENCE AND INNOVATION
The first step in the creation, renovation and preservation of your home involves choosing the right products. In Satinwood Select Steel Siding, you’ve opened the door to the Aisle of Steel Collection – a premier union of heritage and innovation merged with best-in-class materials and future-forward engineering. Our more than 65 years of industry excellence stands strong as our legacy of leadership and trust, where customer happiness always comes first.

We also take special pride in our exceptional “Made in America” quality. Our U.S. operations not only champion the tradition of American ingenuity and craftsmanship, they also fortify our nation with quality jobs and economic dollars. Together, we will continue to strengthen the prosperity of our country.

A STANDOUT CHOICE FOR ENDURING BEAUTY
Renowned for its superb balance of beauty, functionality and strength, metal is on the rise as a leading exterior material. Satinwood Select further elevates the allure of steel with three distinctive profiles, high-performance colors and natural-looking wood textures that inspire unlimited design potential – from contemporary to historic. Strong, stylish and virtually maintenance-free, your home will convey refined quality from every angle.

THE ULTIMATE PROTECTION FOR YOUR HOME
With equal measures of design ingenuity and core strength, Satinwood Select Steel Siding makes an impressive all-weather exterior cladding. Each pre-treated galvanized steel panel is generously sealed with a resilient Kynar PVDF finish for optimal performance. Whatever Mother Nature dishes out, Satinwood Select stands ready to protect your home season after season, year after year.

SUPERIOR TENSILE STRENGTH PROPERTIES
Tensile strength is the amount of stress a material can withstand and is measured in thousands of pounds of force per square inch (ksi). Ultimate Tensile Strength is the maximum force (tension, compression or shearing) applied to a material that results in material failure, such as cracking, splitting and deforming. Satinwood Select is 45,000 pounds per square inch. Yield Tensile Strength is the force (tension, compression or shearing) that is applied to a material and results in some type of material deformity; the material does not fail and it may return to its normal shape when the force is removed. Satinwood Select is 40,000 pounds per square inch.

MASTER CRAFTSMANSHIP is the trademark of our Satinwood Select Steel Siding with Kynar PVDF. This beautifully strong and luxurious panel inspires custom elegance while protecting your home with a powerful steel shield.
THE BEST OF THE BEST: KYNAR PVDF

When it comes to steel coating systems, none can withstand the challenges of weather and time like Kynar resins. The resilient fluoropolymer finish preserves the steel core and creates a luxurious color that resists chalking, pitting, chipping, premature aging and more. Satinwood Select enhances the siding texture even further with its proprietary coating formula.

- Highly weatherable and durable
- Keeps colors beautiful and true with fade-prevention fluorinated polymer pigments
- Low-gloss rating of 7 achieves a strong finish with greater scratch resistance
- High-performance coating protects panels from staining and helps to prevent dirt and other airborne pollutants from adhering to the siding
- Kynar resists mildew and fungus growth; does not have UV-sensitive organic material required for mildew growth

THE HAZARDS OF SILICA DUST

Silica-based fiber cement, such as James Hardie® HardiPlank® Lap Siding, contains respirable crystalline silica, which is considered by NIOSH (National Institute for Occupational Safety and Health) to be a cause of cancer from some occupational sources. Breathing excessive amounts of respirable silica dust can cause a disabling and potentially fatal lung disease, such as silicosis. During installation or handling, a properly fitted, NIOSH-approved dust mask or respirator is recommended. Recommended cleanup includes the use of HEPA vacuums or wet cleanup methods to further limit exposure.3

BEAUTY BEYOND THE SURFACE

Selecting the best siding for your home is an important decision that deserves careful consideration. Fiber cement often gains attention for its appearance of freshly painted wood, but when you look beyond the surface beauty, you’ll see why Satinwood Select is a smart choice.

A FRESH TAKE ON TRADITIONAL DESIGN

Beauty prevails in Satinwood Select’s three classic profiles: Double 4” and 5” Clapboard, 8” Clapboard and 12” Vertical Board & Batten. The subtle sophistication of each panel is further enhanced with natural-looking wood textures and eye-catching colors. Matching and complementing trim and accessories lend a refreshing creative spark with unlimited design possibilities.

DESIGNER TRIM AND ACCESSORIES

To add distinction to your home, use a little creativity . . . and Alside’s trim and accessories. Choose from our complete package of accessories, trim coil and other engineered metal components in matching Kynar PVDF colors to achieve custom style for your home.

Balanced Architectural Emphasis: This style creates visual harmony by using narrow or mid-width trim and accessory products, with siding and trim receiving equal attention in the design process.

Dramatic Impact: Easily draw more attention to areas of architectural interest by using wider trim in a high contrast color to your siding.

THE ART OF THE MIX

There’s no need to settle for siding and trim that almost match. Alside’s ColorConnect® Color Matching System offers smart solutions for every design approach. Color Connect standards have been painstakingly applied to select Alside products to ensure that you are making smart color choices with enduring aesthetic value and the custom look you desire.

Whether it’s a rich color that draws your eye to an interesting architectural detail, or neutral hues applied to a historic home, the Alside ColorConnect Color Matching System helps you successfully match the color of your siding with other Alside exterior products and accessories.

DID YOU KNOW

- Satinwood Select’s Kynar PVDF coating system has a nylon additive that results in a 48% improvement in scuff resistance over polyvinyl chloride (PVC) finishes.
- Steel siding can now be cut with an approved saw blade, making installation faster and easier.
- Because steel siding is “hung,” it floats better on the exterior for a smoother appearance; fiber cement installs tightly to the exterior wall and thus can show unevenness or imperfections in the substructure.

Architecturally pleasing and structurally sound, Satinwood Select protects your home with confidence and reliability (above). Create a look of refined elegance with Satinwood Select 12” Vertical Board & Batten (left).

ENVIRONMENTALLY FRIENDLY

The home that protects you can also help protect the environment. As a durable, eco-friendly product with a long services life, Alside Satinwood Select steel siding reduces the depletion of wood and other natural resources used in home construction. And because it does not need painted, it helps prevent paint, stain and other maintenance-related products from harming the earth.

With a strong commitment to environmental stewardship, Satinwood Select steel siding helps promote resource efficiency – virtually no manufacturing waste, fuel-efficient transport, minimal installation scrap and safe to install. It’s a smart choice for you and a positive choice for the environment!

PEACE OF MIND

Satinwood Select Steel Siding is back by a lifetime limited, non-prorated, transferable warranty with 50 year hail and 35 year chalk and color change protection.* For complete warranty information, including limitations, please see the Satinwood Select Steel Siding warranty.
